# Silvia Ramírez

Silvia Rmz | silviaramirezwork@gmail.com | +34.656.707.545 | silviaramirez-BioT | DevSciLab | Web Portfolio

## Summary

Highly adaptable Microbiology and Biotechnology professional with a commercial mindset, solid experience in quality management, and proficiency in Python automation for administrative and laboratory workflows. Bilingual (Spanish/English) with international background (Mexico/Houston/Barcelona). Specialized in bridging the gap between scientific departments and business operations, managing multiple simultaneous projects with autonomy. Seeking to leverage analytical precision, technical automation, and client-facing skills.

## Work Experience

**Laboratory Researcher / Technician** UAB Sep 2025 – Present

Conducting research and microbiological analysis at the Laboratory of Biotechnology and Microbiology, Autonomous University of Barcelona (UAB). Implementing experimental microbiology protocols, sample processing, bioanalytical testing, and lab data management. Barcelona, Spain.

**Technical Writer & Code Contributor** DevSciLab 2024 – Present

Author technical articles and code repositories on DevSciLab.com, creating tutorials and guides on computational science, biotechnology, and practical automation scripts. Remote.

**Robotics Teacher (Part-Time)** Secundaria FJM 2024 – 2025

Taught middle school students robotics fundamentals, STEM principles, programming logic, and hands-on electronics projects, fostering problem-solving skills.

**Medical Interpreter & Translator** DataMark 2023-2024

Facilitated critical communication between healthcare professionals and patients in high-pressure environments, ensuring accuracy and cultural sensitivity. Managed confidential medical documentation translations (records, consent forms) with strict adherence to deadlines and privacy regulations. Acted as a cultural and linguistic liaison within multidisciplinary teams, directly supporting accurate diagnosis and treatment plans. Houston, TX / Remote

**Quality Analyst & Technical Service Coordinator (Metrology and Microbiology Dept.)** LASECLAT 2020-2023

Executed metrology protocols, including the verification and calibration of measurement equipment, ensuring strict adherence to ISO 17025 and internal quality standards. Successfully managed multiple simultaneous projects related to internal audits, instrument control, and management reviews. Conducted microbiological analysis and compliance testing across production lines, while maintaining the reliability of laboratory equipment. Served as a technical liaison, translating complex metrological and scientific data into accessible reports for clients.

## Projects & Automation (GitHub)

**Business Administration Automation Tools (Python)** – Developed automated tools for corporate administration and financial control, including bulk automated invoicing via the CAMS Casetas platform and an automated reimbursement/expense tracking application with structured Excel generation. (github.com/silviaramirez-BioT)

**Fluorescence Analysis Toolkit** – Fiji/ImageJ batch macro and Python GUI application for automated confocal microscopy image segmentation, statistical data processing, and automated reporting.

## Certifications

**Moderator, Keynote Speech** – 4th International Congress on NanoBioEngineering (UANL, 2024). **ISO 17025:2017 Training** – Clinical Microbiology (AMCEP, 2023). **Innovation Management Certification** – Covered Blue Ocean Strategy and case studies (Embraer, Amazon), International Business School Americas (2021).

## Education

2023 - 2025 MSc. in Applied Microbiology (Graduated) at **Autonomous University of Nuevo Leon (Faculty of Chemical Sciences)** (GPA: 3.0/4.0)

2018 - 2022 Bachelor's Degree Genomic Biotechnology at **Autonomous University of Nuevo Leon (Faculty of Biological Sciences)** (GPA: 3.5/4.0)

## Languages

Spanish (Native) | English (C1) | French (B1)

## Skills

Quality Control & Assurance, Microbiological Analysis, ISO 17025, Audit Processes, Technical Writing & Science Communication, Python (Process Automation for Business Administration, Data Analysis), Process Automation (Invoicing & Expense Tracking), ImageJ, STEM / Robotics Instruction, LaTeX, Medical Interpretation/Translation, Multidisciplinary Collaboration, Problem-Solving, Process Improvement.
